

SEA-CARGO OPEN NEW SERVICE TO/FROM ESBJERG/WEST COAST NORWAY

The Sea-Cargo network is improved by new direct service to/from Esbjerg!

Sea-Cargo is proud to announce the introduction of yet another hub to our well established North Sea liner system – the new hub being Esbjerg/DK.

The Esbjerg link will be introduced as from Thursday 5th July 2007.

The Sea-Cargo liner system, which already includes Aberdeen, Immingham and Amsterdam – is as such complemented by another link into the main heart of Europe. The Esbjerg link will provide our customers with a considerably improved infrastructure for cargoes to/from east Europe, the Baltic area and Denmark.

Esbjerg is also an offshore port, and with direct calls into Tananger, Aberdeen, Ågotnes etc – this new link will provide the offshore bases with a new logistic solution not available today.

The Esbjerg service is a result of a close cooperation with existing clients, in particular those already using the Amsterdam service – and thereby already see the benefit of reduced driving distances by shipping trailers/ containers to destinations closer to/from end users.

The new link will be serviced by our new system vessel, mv Nordia, which will serve Esbjerg in addition to her weekly link to/from Amsterdam. The initial Esbjerg service will be based on weekly sailing:

- Loading Bergen Wednesday morning
- Loading Tananger Thursday afternoon
- Discharging Esbjerg Friday morning
- Loading Esbjerg Friday evening
- Discharging Tananger Saturday afternoon.
- Discharging Bergen Sunday evening.

(pls see www.sea-cargo.no for exact schedule details)

The initial setup will be based on a weekly service structure, with end week sailing in both directions. The concept is to increase frequency in line with market demand (expected to be 3 sailings/week), and a revision of phase one by mid August will determine the final structure, schedule and frequency profile.

Please forward your booking enquiries, operational or commercial request to Sea-Cargo at Hop, or at one of our Sea-Cargo Agency offices in Bergen or Stavanger.

Please do not hesitate to contact us for further information and/or for your enquiries.

Capacity mv Nordia:

Trailers:	74 units
Containers:	200 teu
